IPF Partners completes €15m financing with Lumeon

June 2022

IPF Partners is pleased to announce the closing of a €15m debt financing provided to Lumeon, a UK based digital health company providing management care solutions to the healthcare industry.

Health systems use Lumeon's digital health platform to transform their care delivery processes into seamlessly orchestrated, personalized, virtualized care centered on each patient's needs. With Lumeon, care delivery becomes frictionless, efficient, and effective, ensuring the best standard of safe care is delivered every time.

Lumeon's award-winning platform transforms EHR data into an operational plan of care, engaging, coordinating, and guiding consumers and care teams, alike, along the way. It extends and automates health care to wherever the consumer is, whether at the care setting, home, work, or on the move.

The funding provided by IPF will be used to support the next growth phase with numerous attractive opportunities in both the UK and US markets.
